IV C/1	City of Venice	IT	Innovation for Growth Innovative ICT tools to develop strategies and methodologies for a competitive and sustainable tourism policy	Exchange of experience for the identification and analysis of ICT-based policies and competitiveness strategies for the sustainable growth of the economic activities linked to tourism and for the increase of job offer in areas characterized by unbalanced tourism flows	1	RIP	regional authorities	14.11.2008
IV C/2	Apulia Region	IT	UATSE PROJECT Urban Attractivity to Sustain Entrepreneurship	Exchange of best practices in the field of urban attractivity, territorial marketing and participated decision processes, in order to experiment samples and evaluate the most performing (in relation to specific territory). The idea is based on the assumption that if a region is able to attract investors, capitals and brains, then opportunities for entrepreneurship are expected. The more citizens participate this process, the more the new deriving economy will be sustainable.	1	-	(nicht näher definiert)	19.11.2008

IV C/4	AIP Augsburg Integration Plus GmbH	DE	BINS transnational	One of the Lisbon criteria is to raise the employment rate of people between 55 and 64 yeears to 50%. To reach that goal the German government launched a programme calle perspektive 50 plus. The programme targets long time unemployed people of the so called generation 50 plus. Institutions in 62 regions of Germany develop strategies to raise and preserve the workability and the employability of this generation as well as to show sustainable stragies for a come-back. In Augsburg the partners developed several coachings and management strategies as well as a role model in mentoring for companys and employees / unemployed people.	-	-	(nicht näher definiert)	20.11.2008
IV C/5	AIP Augsburg Integration Plus GmbH	DE	E-CHANGE Combatting challenges of demographic change with e-learning tools	Due to the demographic trend in Europe forces a change in HR-Management for SME. To realise that change SME need professional assistance from external experts on tools and methods. Most of the tools are connected to certain industries and regions. Modification ist a key aspect. Therefore an evaluation of different projects and the experiences of experts in European regions has to be the kick-off for this project. To develop tools to combat the challenges of demographic change general standards need to be set. On basis of these standards the tools can be tuned to fit the demands of different regions and branches. The general aspect of the developed tools needs to be spread suitably. In SME time and man power are valuable and rare ressources. Training can hardly be done during the job. The e-learning tool will offer a chance for training on demand. With its function the tool also offers the opportunity to create a sustainable network of experts to secure transnational and transregional exchange.	-	-	(nicht näher definiert)	20.11.2008

IV C/6	TECLA Association Association for the local and European transregional cooperation	B	IMPLEMENTING MODI	<p>Potential partnerships interested in Capitalisation Projects will have to demonstrate that they have good results and transferable tools and approaches, as well as good management skills and knowledge of the theme in question. This knowledge could for instance be the result of a previous INTERREG IIIC project, as it is the case with the 2000-2006 INTERREG IIIC MODI, lead by TECLA.</p> <p>MODI (Digital Mountain), was a European project developed within the INTERREG III C South Programme. The project started in April 2004 and finished on 30 September 2006 after a thirty months development.</p> <p>MODI was a pilot project whose purpose is to demonstrate that isolation and underdevelopment phenomenon - typical of peripheral areas - can be overcome thanks to:</p> <ul style="list-style-type: none"> • the improvement in the use of ICT • a cooperative approach among different European Countries 	1	CaP	Public authorities or Public equivalent bodies; The partners' territory should present mountain communities with digital divide problems & difficulties in accessing Public services or have best practices in this field;	21.11.2008
IV C/7	Development Agency of the Emilia Romagna Region	IT	S.O.S. Safety On construction Site	<p>The main and final objective of our project is the drawing out of general guidelines that can be useful to create a safer work environment in the construction sector . We imagine that we can improve our local approach to the problem by exchanging experiences, information and best practices with different regions located in different areas of Europe. By doing so we can compare and learn from each other, this way helping weaker areas and gaining knowledge from the stronger ones. The very ultimate aim of the project is to draw out, share and spread a model that can be adopted throughout Europe.</p> <p>The main aim of the project is to strengthen regional policies in the field of security in the construction sector, thank to the exchange and adoption of good practices shared among project's partners.</p>	1		public Administrations, such as Regional Governments, Municipalities, public development agencies, public boards in charge of safety and injury prevention	26.11.2008
IV C/8	Regione Marche	IT	WOMEN IN FISHERIES	<p>The project, in line with the "gender perspective" Ue policy, starts from the awareness of the all-time presence and relevance of women in the Ue fishing supply chain</p> <p>The project will contribute to the professional recognition, local historic traditions rediscovery, knowledge development, local best practices exchanges of the women in fisheries</p>	1	RIP	European Regional public bodies dealing with fisheries, aquaculture, equal opportunities, culture, interregional cooperation.	27.11.2008

IV C/9	Vulcan Town Hall	RO		<p>The Vulcan Town is situated in the southern part of Hunedoara County, Vest Region, from Romania. It becomes town in 1952 and in 2003, it was declared municipality, there are around 30.000 citizens and the total surface is 8.731ha.</p> <p>During the years, Vulcan was a monoindustrial town. Between 1997-1999 were serious mining reorganizations and the focus of the Government and of the Mayor House was to develop private companies and to promote the tourism from our area, because as you see on our website: http://www.e-vulcan.ro/ we have beautiful landscapes, a lot of mountains and The Jiu River near the town. Jules Verne had visited our places and he wrote about them in his novels.</p> <p>We are interested in collaboration with a town from your country, especially for twin towns. We haven't had a twin town, so far, so we are interested in.</p> <p><u>We are interested in collaboration with the same regions as coal mining reorganization and furtherer for tourism</u></p>	-	-	sucht Beteiligung an Projekt (coal mining, tourism development)	28.11.2008
IV C/10	Valencia Regional Government on Trade and Innovation	ES	REINPO-Retail Regional Innovative Policies to reinforce the Retail sector	<p>REINPO-RETAIL is an INTERREG IVC Regional Cooperation project idea with the objective of improving regional policy across Europe in retail sector innovation. The project's guiding theme is anchored in the framework of the Lisbon and Gothenburg strategies as the SME retail sector represents 13% of the EU's GDP and is in urgent need of revitalisation through research and development to improve its competitiveness. The project aims to promote an effective transnational exchange of experience and knowledge transfer between partners as well as the design of innovative tools for the SME retail sector that contribute to its legacy and sustainability beyond the time boundaries of this INTERREG IVC funding stream.</p>	1	RIP	searching for cities with competences in the area of the project (Retail – Urban Commerce, innovation for retail sector...)"	03.12.2008
IV C/11	PROVINCE OF BRINDISI – PUGLIA ITALY	IT	BIP BIODIVERSITY IMPROVEMENT IN PROTECTED AREAS (BY MINIMIZING TOURISM IMPACTS)	<p>Ecotourism is a relatively recent travel practise which directly promotes the protection of nature and tangibly contributes to the well being of local people (Christ, 2004). It is considered as a catalyst for protecting nature and supporting cultural heritage, this notwithstanding a fully understanding of its impacts is requested. Due to the generalised opinion on the positive impact of ecotourism on the existence of protected areas, very scant attentions were addressed to understand its negative impacts. The present project aims at suggesting a sustainable management tool for the protected areas of the reference Regions. In order to find that out, it will be a strong cooperation between the whole partnership. In particular the project aims at sharing the best practices of the partners with more experience in management of protected areas. There will be analysed the management of some protected areas (including the marine ones) in the relevant Regions and the output of the project will be the editing of a document on sustainable management of protected areas resulting of the cooperation work between the whole partnership.</p>	-	-	(nicht näher definiert)	05.12.2008

IV C/12	Tourism and Sustainable Development Unit within the Office of the Prime Minister in Malta	MT	(CH)ANGE (children can make a change) is a project aimed at young children and tourism sustainable development in regio	As a whole it aims to understand what triggers the young of today to react to a changing environment and thus to promote a pro-active rather than re-active cultured society for tomorrow. The project shall assess the level of awareness of children aged between 7 -14 years on sustainability issues in relation to tourism. It will create a regional benchmark on the level of know-how that exists in these young age groups. Through the benchmarking process, the research carried out and the analysis of what stimulates children it will create a mix of methodologies and activities ideal for educational purposes to be used in schools and by teachers that will serve as a regional initiative to react to the current and future socio-economic changes.	-	-	(nicht näher definiert)	05.12.2008
IV C/13	Hampshire County Council	UK	Climate Resilient European Communities	Hampshire County Council is currently developing an Interreg IVC European project which aims at creating a European holistic framework for climate resilient communities. This project will develop opportunities and guidance on how to embed climate resilience into existing and planned developments. We believe that inter-regional cooperation is essential to develop sustainable solutions as it brings together learning, expertise, innovation and experience that can be applied across different cultures, legislation and governance.	2	-	Partners will need to have expertise in a particular sector: urban design, water and flood management, transport, infrastructure, energy supply, green space, urban-rural linkages, risk management, change management.	08.12.2008
IV C/14	SICILY REGION EU programmes Division-Regional department for Environment and Territorial Planning	IT	EDEN Environmental development Network	The project aims at qualifying regional policies through an efficient model (integrated and multi-level planning) for managing protected areas in Europe. This general objective will be pursued by means of a capitalization process of the results achieved through projects like RDP. The exchange and transfer of good practices in terms of methodologies, operational tools, planning approaches identified for protected areas through case studies and study visits, will be a starting point for an integrated programming process. The methodology for drafting the Regional actions plans will represent the strategy elaborated by the PPs in terms of process, actors and indicators for enhancing the transfer of good practice in to the regional policies.	2	CaP	looking for a partner (regional authority/agency) dealing with environmental protection at a regional level	09.12.2008
