## I. INTRODUCTION

This document aims at providing to all Lead Applicants participating in the 4<sup>th</sup> Call for proposals of the CENTRAL EUROPE Programme the most in-depth information possible concerning the technical characteristics of the Application Form. In addition, it provides useful explanations about the interlinks existing among the different sections of the Application Form and, in particular, on the Error messages that highlight the existence of inconsistencies in the contents proposed by the applicants.

Given that it is a requirement to submit a duly filled in Application Form and presenting no Error messages on eligibility criteria, all Lead Applicants are strongly recommended to carefully read these instructions.

Should you be confronted with any problem when filling in the Application Form, please contact the CENTRAL EUROPE Joint Technical Secretariat:

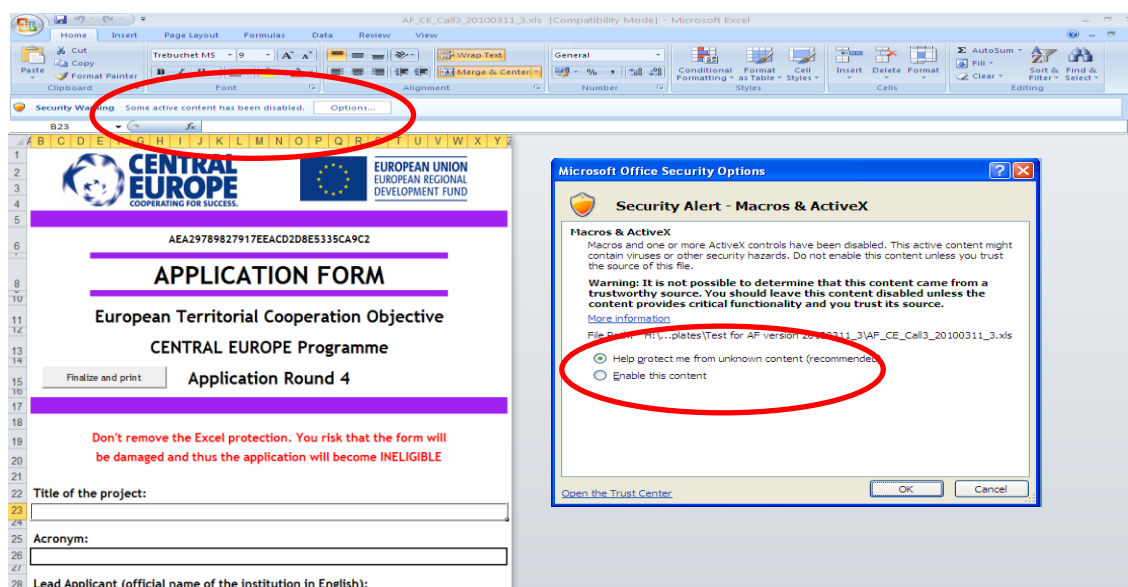

**Email:** [info@central2013.eu](mailto:info@central2013.eu)

You will receive an email-reply or a phone call at the earliest possible.

## II. GENERAL INSTRUCTIONS

### II.A Basic technical requirements:

- The Application Form is an Excel document and has therefore been **programmed for Microsoft Office Excel use; the proper functioning under other systems (e.g. Apple, Open Office) is not guaranteed and might destroy the programming** of the form.
- The minimum standard should be MS Office Excel 2003 or a later version.
- The English version of these MS Office-programmes has been used as default.
- **Macros:** since the Application Form uses several Macro-functionalities in order to make the complex document more user-friendly, Macros have to be **activated**. Depending on the PC-system, and when opening the Excel-document, the following cases might occur:
  - A window might pop up asking whether you would like to activate the Macro - confirm by clicking “activate/enable Macros”
  - In other cases, you have to do it actively by selecting the respective Menu
- **Security level:** the security level has to be set to **“medium” or lower**. As in the case of the Macros, it might be that your PC-system has set the security level to “high” by default.
  - You can change the security level by selecting Menu - Extras/Tools - Macros - Security - Security level - Medium

## II.B Warning messages:

- **ERROR messages.** As stated above, Error messages are to be avoided under all circumstances due to their negative impact on the eligibility of the proposal. In order to assist applicants, an **overview** of all ERROR messages is given in the **section COVER SHEET**. Prior to the submission of the Application Form, please make sure that no ERROR message appears in this overview. INCOMPLETE messages should be avoided as well in order to ensure a fully filled-in Application Form.
- **Red colour of text / amounts.** This situation has also to be avoided under all circumstances. You will be mainly confronted with any of the following cases:
  - Red colour of text: you have exceeded the maximum number of characters. Even if the text exceeding the maximum number of characters will not be automatically deleted from the electronic version of the Application Form, this text will not be visible in the printed version and therefore will not be taken into account during the assessment of the project proposal.
  - Red colour of figures (budget tables): you have exceeded a threshold or there is a mismatch between sections. In most cases an ERROR message pops up in addition.
  - Red colour of duration: the duration of a single action is exceeding the overall project duration. Please review the start and the end date and amend accordingly.
  - Red colour of partner names in fields with drop down menus (Associated institutions, Work package “responsible partner”, Budget specifications): The partner name has been changed or the project partner has been deleted in the partnership section. The information has to be updated. Please select the partner again from the drop down menu.

Please refer also to the instructions given in the PARTNERSHIP AND BUDGET section for further cases related to this technicality.

- **Incomplete messages.** The **section COVER SHEET** provides an **overview** on all sections that are not fully filled. Prior to the submission of the Application Form, please make sure that no INCOMPLETE message appears in this overview.

Form has to be filled in and returned by post as printed version and on CD-ROM/other device:

## II.C Proper use of Excel:

- Copy and paste of text/numbers: Be aware that you are working in a pre-programmed Excel form. Therefore make sure that you **copy only the content of a cell and not the cell itself**, since this might destroy the proper functioning of the form. Hence either copy/paste the text in the formula bar in the Excel menu heading or double click on the cell and then copy/paste the text.
- Use “Tab” instead of “Enter”.
- Text boxes: each single text box in Excel is limited to the indicated amount of characters (e.g. 1000 characters); in order to avoid problems of exceeding this threshold and of risking to lose the text, regularly check the number of characters which is indicated at the bottom of a text box. In order to allow Excel to count correctly, you have to leave the text box first (move cursor to another place).
- Text boxes: in order to write/amend a text box, enter the box and double-click.
- Partnership: In case you would like to **change the institution name** of a project partner (both, original or English institution name), please **double-click the box** and change the name then. In case you tick the box only once and then press the delete key, **you delete the partner as such and all related partner information will be lost!**
- Project budget: In case you would like to **change the name of an investment**, please **double-click the box** and change the name then. In case you tick the box only once and then press the delete key, **you delete the investment as such and all related information in the investment section will be lost!**
- Transfer of data: please allow sufficient time for a proper automatic transfer of data between different sections.
- If you want to use a bullet list in any of the input fields in the Application Form, please press 'Alt+Enter'.
- Drop down lists: select one of the pre-defined items. In case a mistake is made, just select another item.
- Tick-boxes: you can tick the corresponding item and an “X” will appear. In case a mistake is made, delete the X by pressing the “Delete button”.

## II.D Verification Code - Checksum:

In order to ensure the full consistency of hardcopy and electronic versions of the Application Form, both documents have to indicate the same “Checksum” number which serves as verification code.

After having fully filled-in the Application Form and before printing the hardcopy, press the button “Finalize and print” on the front page of the Application form. The Checksum will be then automatically calculated and the document prepared for printing.

The necessary steps are as follows:

- 1) **Fully fill-in the Application Form**
- 2) **Press “Finalize and print” button**
- 3) **Save the document as the final electronic version**

In case of changes afterwards you have to **press the button and save the document again** in order to ensure an identical Checksum number on both, electronic and hardcopy document.
